За подходяща подова основа се препоръчва използването на бетонна подложка или големи бетонни квадратни плочки. Уверете се, че тя е здрава и равна и ще позволи дренаж далеч от мястото. Направете нивелирана бетонна основа, която има външен размер от 241 1/8" x 146 1/2" (6124 mm x 3721 mm) за основен навес. **За бетон основа на подложка, подгответе ниво легло за твърда основа слой от натрошен камък. След това бетонната подложка трябва да се излива на дебелина от 4 инча (100 mm) до 5 инча (125 mm). Оставете да изсъхне напълно за поне 48 часа. Производителят не носи отговорност за избора и изграждането на основата.**
